

Final Rerport - Home Module

1. Execution Overview

- Project: DOS UAT Automation
- Module under test: Home Page
- Execution date: 2026-02-20T08:37:12.022Z
- Run started (UTC): 2026-02-20T08:33:39.135Z
- Environment URL: <https://dos-web-uat.abym.us/>
- OS: win32 10.0.22621
- Node.js: v25.6.1
- Playwright: Version 1.58.2
- Command executed: `npx playwright test tests/home/homepage.spec.ts --workers=1`

2. Summary

- Total scenarios executed: 8
- Passed: 7
- Failed/Timed out: 1
- Skipped: 0
- Total execution time: 70.8s

3. Scenario-wise Result

Test ID	Scenario	Status	Duration (s)	Evidence
HC-001	home\homepage.spec.ts > home page > loads home page and shows core modules	Passed	2.3	-
HC-002	home\homepage.spec.ts > home page > all visible home page buttons are working	Passed	6.2	-
HC-003	home\homepage.spec.ts > home page > eye icon and download selected actions are working	Passed	3.3	-
HC-004	home\homepage.spec.ts > home page > top navigation links route to expected pages	Passed	3.5	-
HC-005	home\homepage.spec.ts > home page > all header icons open expected page or modal	Passed	10.5	-
HC-006	home\homepage.spec.ts > home page > search works with icon click and Enter key	Timed Out	36.3	../test-results/home-homepage-home-page-se-613c7-th-icon-click-and-Enter-key-chromium/test-failed-1.png ../test-results/home-homepage-

				home-page-se-613c7-th-icon-click-and-Enter-key-chromium/video.webm ../test-results/home-homepage-home-page-se-613c7-th-icon-click-and-Enter-key-chromium/error-context.md
HC-007	home\homepage.spec.ts > home page > add to cart shows login warning for guest user	Passed	2.6	-
HC-008	home\homepage.spec.ts > home page > pagination works on home catalog	Passed	2.0	-

4. Failure Analysis

Issue 1: home\homepage.spec.ts > home page > search works with icon click and Enter key

- Status: Timed Out
- Error: Test timeout of 30000ms exceeded.
- Evidence:
- ../test-results/home-homepage-home-page-se-613c7-th-icon-click-and-Enter-key-chromium/test-failed-1.png
- ../test-results/home-homepage-home-page-se-613c7-th-icon-click-and-Enter-key-chromium/video.webm
- ../test-results/home-homepage-home-page-se-613c7-th-icon-click-and-Enter-key-chromium/error-context.md

5. Stability Check (Targeted Rerun)

Command executed: `npx playwright test tests/home/homepage.spec.ts -g "search works with icon click and Enter key" --workers=1 --reporter=json`

- home\homepage.spec.ts > home page > search works with icon click and Enter key: Passed (3.2s)

6. Business-Facing Conclusion

- Core header, navigation, icon interactions, search, guest add-to-cart warning, and pagination scenarios are automated and executed.
- One intermittent timeout was observed in the full run when catalog rows were not available within test timeout.
- Immediate isolated rerun for the timed-out scenario passed, which indicates environment/data-load instability rather than deterministic functional break.
